Logistics, storage & distribution services

About us

ATL Haulage Contractors is a leading transport company, providing logistics services and assisting the carriage of both import and export cargo. Headquartered in the state-of-the-art DP World London Gateway super port, our team has a combined industry experience of more than 75 years. We're committed to delivering professional, punctual and reliable haulage solutions, using the latest developments in technology and a fleet capacity of more than 250 top-end trucks.

With offices in both London and Southampton, we are strategically positioned to serve all UK ports. ATL Haulage Contractors is also a certified waste carrier, accredited to ISO and a member of the Road Haulage Association. We give utmost priority to our clients' requirements, providing support to enhance your business's performance and productivity.

Why choose ATL Haulage Contractors?

CREATE, INNOVATE AND DELIVER

ATL Haulage Contractors has a simple mission: to create tailor-made haulage solutions, always evolving and innovating in response to our clients' needs, to deliver the most efficient possible service.

PERSONALISED SERVICE

We provide personalised assistance to all our clients. By allocating a dedicated account manager to each customer, we ensure that you deal with the same representative each time you contact us.

STRATEGIC PLACEMENT OF FLEET

Our fleet is strategically positioned to cover all major ports in the UK. As a result, we're able to make sure that all deliveries reach your customers as scheduled.

ISO ACCREDITED

ISO certification corroborates our status as an efficient, reliable and trustworthy partner. We deliver your goods safely and swiftly.

THE LATEST TECHNOLOGY

We invest heavily in up-to-the-minute tech – from GPS positioning to instant proof of delivery – so we can offer one of the most state-of-the-art and efficient delivery services on the roads today.

Our people

Our highly experienced team is our biggest strength. We're dedicated to providing an responsive, punctual and professional service and have a flexible approach to working with diverse sectors, earning ATL Haulage Contractors an enviable reputation within the industry. It's our aim to exceed your expectations and build a relationship with you that's solid and long-lasting. We constantly develop creative and innovative solutions to deliver the service your business needs.

Our flexibility

With our UK-wide network and direct access to the port systems, it's easy for us to tailor a bespoke service for your company, focusing our extensive resources wherever you need them. Through our dedicated partnerships, we can also utilise rail as a low-carbon transport solution across a range of cargo types. However big or small your business, we'll flex to your specific requirements – and the ATL team is always ready to respond to your needs, day and night, seven days a week.

Our low costs

The benefit of our large fleet and commitment to fuel efficiency means we can pass the savings onto our customers, ensuring highly competitive rates.

Services

ATL Haulage Contractors offers high-quality, individually tailored logistics support and services to a very broad spectrum of businesses – primarily shipping lines, freight forwarders, cargo owners and importers, but also the creative industries including promotions, exhibitions, film and concerts. We are highly experienced in coordinating time-sensitive deliveries. Our range of services include...

UK container transport

We offer container solutions and support to a range of businesses, servicing all major UK ports, with a presence in London Gateway, Tilbury, Southampton, Felixstowe and Liverpool.

At ATL Haulage Contractors, our client's business is our priority. Our strong communication network and heavy investment in the very latest technology (including GPS positioning, instant proof of delivery and real-time ETAs) ensure the container's entire journey is as efficient as possible – quick, trackable and on time.

We are committed to providing you with the very best service, keeping costs low while efficiently fulfilling your business's needs.

Multi-drop distribution

ATL Haulage Contractors is one of the UK's leading general haulage services providers, covering all major destinations in the UK and across Europe. With a large fleet and a highly experienced team, ATL Haulage Contractors are specialists in road haulage and logistics, and promise high-quality service and facilities. Experts in UK multi-drop distribution, we can collect a full load – including fast-moving consumer goods (FMCG) – to be delivered to a number of different points such as regional distribution centres for localised onward delivery.

Traction-only trucking

For clients wishing to provide their own trailers, ATL Haulage Contractors can offer traction-only trucking. We supply and operate the vehicles – you supply the trailers.

Drop & swap

Are you looking to maximise efficiency? Thanks to our extensive fleet, ATL Haulage Contractors offer a Drop & Swap service, where we operate around the clock, eliminating "dead" unloading time by dropping off a full container as we take away an empty one. By the time we return with a new load, the previous one is empty – both lowering costs and reducing environmental impact.

Specialist trailers

Whatever the job – however nonstandard – ATL Haulage Contractors has the equipment and expertise to suit your business needs. We offer a diverse range of specialist trailers, including skeletal, multifunction, low loader, lightweight and tautliner.

Genset trailers

Transporting temperature-controlled cargo? We have a fleet of underslung and front-mounted genset trailers, ready to be plugged into your container. This eliminates the need for you to hire a genset for each delivery, saving on rental charges.

Contract hire

We can create a bespoke contract for your business, enabling you to hire a dedicated fleet of our trucks for a set period, fully operated and managed by the experts at ATL Haulage Contractors. On request, these can be in your company's livery to promote brand awareness while your trucks are on the road.

Hazardous goods

When using ATL Haulage Contractors, you can be assured that we have a number of highly experienced ADR-trained drivers who are qualified to transport dangerous goods. Whatever your requirement, we will establish the most efficient method of delivery without ever compromising on safety.

Technology

At ATL Haulage Contractors, we make it a priority to invest heavily in the very latest technology, embracing the huge advancements in data tracking. These developments have allowed us to revolutionise the customer experience – eliminating paperwork and keeping you fully informed in real time about your delivery's progress. Our journeys are as efficient and operationally flexible as possible at every stage.

REDUCING CARBON OUTPUT

Using cutting-edge Fleet Performance telematics and live-streaming vehicle CCTV monitoring, we encourage drivers to adopt a fuel-efficient driving style which delivers cost savings as well as marked increases in safety and security. As a result, we can monitor and motivate our drivers to improve their productivity levels, as well as ensuring that carbon output is reduced.

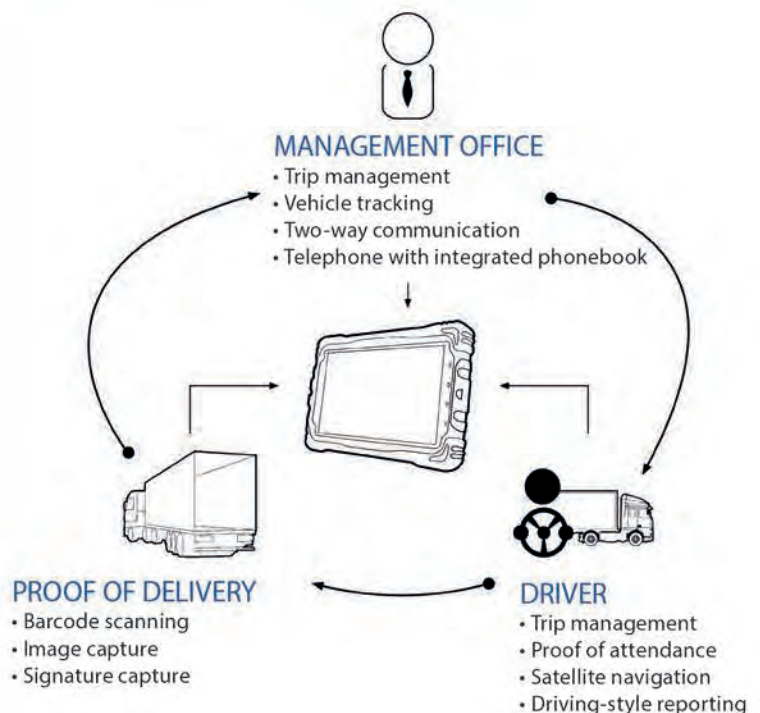

TRACKING YOUR CONTAINER

ATL's investment in GPS positioning tools, integrated route planning and GPRS tracking means that your container can reach its destination quickly and punctually. Crucially, our cutting-edge journey-management tools offer transparency for clients, including real-time visibility of active routes, guided navigation and up-to-the-minute arrivals and departures boards. Communication with customers is instant, via automated SMS and email notification, and we can quickly identify any deviation from the schedule using live data.

Our technology makes sure that you always know the location of your containers. You can monitor the status of trips against the schedule and can accurately predict when they will reach their destination thanks to our on-screen, real-time proof of delivery (POD) systems – complete with hi-tech signature and image capture on arrival.

RAPID INTEGRATION WITH YOUR OWN TMS

If you'd like us to work with your own logistics platform, we also have the technological capability to integrate with any other transport management system (TMS), including Paris, FIS and TLN, plus a wide range of others.
